

PROGRAM PROPOSAL

Proposed Program Name: Decentralized Ecosystem Growth

Sponsoring Member: IHS Markit w/ input from Clovyr

Initial PMC Lead: Amber Baldet

Proposed Scope: The program’s purpose is to aggregate, develop, and integrate tools that facilitate coordination of decentralized applications across financial firms and existing ecosystems. Best practices and promising architectures may be proposed and circulated, but the goal is not to create top-down standards documents. Instead, we will work together to ensure there is concrete code, open-sourced both within FINOS and across various member and non-member firms’ repositories, which work together to reduce time-to-market for decentralized financial applications.

Program Operations Policy: Standard:

Amended: (please provide redlined POP with this proposal)

Initial Projects and/or Working Groups

Name	Scope	Initial Roster
Decentralized Technology	One place for everyone to work together to propose projects, test tools, etc.	TBD - Contributors Requested
Ecosystem growth	Outreach to other relevant groups like the Enterprise Ethereum Alliance, Hyperledger, and the Web 3 Foundation to facilitate cooperation and test interactivity	TBD - Contributors Requested
Clovyr FINOS Framework	Focus on developing Clovyr FINOS Edition (financial integrations, cross-FINOS integrations)	Amber Baldet
